

STERA SHEEN®

G R E E N L A B E L

Food-Safe Machine Lube **Heavy-Duty High Performance** **Sanitary Synthetic Lubricant**

For 60 years Stera-Sheen Green Label has led the way without so much as a tweak in formula. Until now.

At Purdy Products we make it our aim to create products that make your life a whole lot easier, saving you precious time and money along the way.

Welcome to an exciting new addition to that claim, with our new lube we have succeeded in matching the performance of all our Stera-Sheen Green Label Products

Product Availability is immediate.

Product attributes and selling points:

- A NSF listed, synthetic lubricant developed for maximum performance while remaining clear, tasteless and odorless
- A synthetic formula will hold up and last longer than petroleum-based lubricants ensuring machine performance under a wider range of conditions
- Formulated for extended lubrication intervals with high load bearing capabilities
This extends bearing, slide and seal life, reducing the need for frequent machine maintenance
- NSF listed H-1, approved for incidental food contact
- Temperature range of -40 degrees F to +350 degrees F
- Resists water washout but can be removed with clean-in-place solutions (i.e. Stera-Sheen Green Label) to yield a clean, sanitary surface
- Will not dry out, gum up, separate or bleed
- Tacky (sticky) formula allows for material to “stay where you put it” without sacrificing lubricity

Stera Sheen Food-Safe Soft Serve Machine Lube

MSDS available on request

Heavy Duty-High Performance Sanitary Synthetic Food Grade Lubricant

For Use with:

- Food Processing Equipment,
- Frozen Dessert Equipment,
- and More

Synthetic lubricant developed for maximum performance while remaining clear, tasteless and odorless

A synthetic formula will hold up and last longer than petroleum-based lubricants ensuring machine performance under a wider range of conditions

Formulated for extended lubrication intervals with high load bearing capabilities

This extends bearing, slide and seal life, reducing the need for frequent machine maintenance

NSF listed H-1, approved for incidental food contact

This is exactly what you are looking for in a heavy-duty, high performance, sanitary, synthetic lubricant. Stera-Sheen's synthetic formula will hold up and last longer than petroleum-based lubricants ensuring machine performance under a wider range of conditions. This food grade grease will not dry out, gum up, separate or bleed.

- Odorless
- Tasteless
- Clear Gel
- Wide Temp Range (-20F to 350F)
- Engineered for Food Processing Equipment
- Repels Moisture
- Ideal for Frozen Dessert Equipment
- NSF registered H-1 for incidental food contact
