July 31, 1980

Mr. Frank M. Hachinski
W. F. Leonard Co. Inc.
Post Office Box 195
Meriden, KS 66512

Dear Mr. Hachinski:

This is in reply to your request for compound authorization received on July 15, 1980.

Your product Shurfoot (Revised) is acceptable for use as an absorbent or anti-slip agent for spot application to floors to correct a hazardous condition in official establishments operating under the Federal meat and poultry products inspection program. Such products may be used in all areas provided that use is limited to the portion of the floor area where the hazard exists and does not result in dusting, tracking, or other objectionable conditions. The product may not be used as a substitute for good sanitation. It must be removed as a part of the routine floor cleaning operation.

The final granting of authorization for the proposed use of such compounds is the responsibility of the inspector in charge of the official plant. Technical assistance will be provided by the Product Safety Branch upon request.

Acceptance of compounds by this Department is in no way to be construed as an endorsement of the compounds or of any claims made for them.

If any change is made in the labeling information or formulation, the authorization for use in official plants becomes void immediately.

Sincerely,

Charles R. Edwards
Chemist-In-Charge
